StrideMASTER Speed Maps are generated using each horse's settled positions from their previous starts. The settled position is usually taken at the second 200m sectional crossing point in the race. This report is automatically generated from the StrideMASTER database using historical data from the horse's previous starts.

StrideMASTER Speed Maps are generated using each horse's settled positions from their previous starts. The settled position is usually taken at the second 200m sectional crossing point in the race. This report is automatically generated from the StrideMASTER database using historical data from the horse's previous starts.

StrideMASTER Speed Maps are generated using each horse's settled positions from their previous starts. The settled position is usually taken at the second 200m sectional crossing point in the race. This report is automatically generated from the StrideMASTER database using historical data from the horse's previous starts.

StrideMASTER Speed Maps are generated using each horse's settled positions from their previous starts. The settled position is usually taken at the second 200m sectional crossing point in the race. This report is automatically generated from the StrideMASTER database using historical data from the horse's previous starts.
