

Hobart 14 March 2020

The nominations for the 30 to 59 national ratings race will be divided into 2 races based on Lifetime Earnings.

The races will be formed by selecting the horses from the highest lifetime earnings down. The first race shall be the 12 horses with the highest lifetime earnings and the second race will be the next 12 highest lifetime earning horses. The two horses with the next highest lifetime earnings shall be named as emergencies for both races.

In the event of horses on the same lifetime earnings having to be split, the horse with the highest number of lifetime wins shall be deemed the highest rating and then the horse with the highest field selection points and then by random draw.

If there are insufficient nominations for two races, the nominations shall be extended.

If after extending nominations there are at least 6 but less than 12 acceptors for the second race, the race will be conducted but there will be no emergencies named for either race.

If nominations are extended then the original nominations shall be first selected and if excess nominations above what is required are received during the extension period, then the extended nominations shall be selected on the same basis as the original nominations.
