“ It’s just a love for the horse. ”

I absolutely love that connection I have with them, their individual personalities, their characteristics. I form a bond with them, which I really love, and I get to know them, they become your best friends . . . that’s a real passion for me . . . **it’s exactly why I race.**

TASRACING'S NEW CHIEF VETERINARY AND ANIMAL WELFARE OFFICER APPOINTMENT

Story by Nick Turner

Tasracing has appointed Dr Martin Lenz to the newly created position of Chief Veterinary and Animal Welfare Officer.

Dr Lenz will lead Tasracing's work to ensure the organisation meets its animal welfare objectives. One of his principal roles will be to provide advice and services to Tasracing and the Tasmanian racing industry regarding the delivery of animal welfare and veterinary services.

Dr Lenz is highly experienced and well credentialed regulatory veterinarian, having worked in equine veterinary practice in Australia and the United Kingdom, and as a racing vet at the Singapore Turf Club.

In 2007 Dr Lenz started working as the inaugural Veterinary Officer for Racing Queensland, the same year that Equine Influenza broke out (Queensland was one of the two Australian states seriously impacted by the outbreak).

He joins Tasracing after six years as the Director of Veterinary Services and Animal Welfare at the Queensland Racing Integrity Commission and prior to that had worked for Racing Queensland from 2007.

Dr Lenz is passionate about the racing industry and believes that racing's future

DR MARTIN LENZ | CHIEF VETERINARY AND ANIMAL WELFARE OFFICER

prosperity is intimately linked to how well the horses and greyhounds at the centre of the industry are looked after.

"I see great potential in our ability to optimise racing animal welfare through life-time traceability, injury monitoring and minimisation and rehoming programs for all racing animals, all of which are strategies designed to maintain and build public trust in this great industry," he said.

"And I am very much looking forward to working with all stakeholders to achieve these outcomes."

Tasracing CEO Andrew Jenkins said animal welfare was a key component of responsible racing.

"Tasracing places the welfare of racing animals across all three codes front and centre

"Dr Lenz's appointment to this newly created position will assist us to continue to meet this important obligation and drive further improvement in line with community expectations."

HARNES FEATURES

YOUR BEST CHANCE TO GAIN A START

Trainers can and should accept for more than one race at a meeting. Trainers are strongly encouraged to nominate for multiple races that their horse is eligible for.

If you have a preference, these must be clearly advised either on the Fax Acceptance Form or on Harnessweb by a brief message in 'Nomination Comments' i.e. (01: 1st Pref, 02: 2nd Pref). Please keep preferences very brief (less than 25 characters).

If preferences are not advised by the closing time for acceptances ORI will place the horse at their discretion. A horse with a preference (2nd) may be moved to that race rather than left as the emergency in its first preference.

While preferences will be considered, ORI may place a horse at their discretion to maximise race numbers or field sizes.

If you are unsure if your horse is eligible for multiple races, please contact ORI (03) 6777 1900.

Manual Field Selection applies to all races with prize money of \$15,000 or more and heats of races where the final is \$15,000 or more, unless otherwise specified in the race conditions. A horse that has not previously had a race start has no exposed form. Therefore, horses that have had a race start will be included first under the Manual Field Selection Policy. Trial form will not be considered. If balloting is required with multiple unraced horses a random ballot will be conducted to determine which of the unraced horses gain a start.

When races are divided by points (high and lower points divisions), the Unfulfilled Engagements and Extended Races policies do not apply if the total number of acceptors is equal to, or less than, the combined field limits.

Waiver

Race meeting details in this publication are published on behalf of Tasracing and the Office of Racing Integrity and reserve the right from time to time to alter the date of running, to make any alteration or modification to these races, to alter the sequence of races, to cancel the meeting or any portion thereof, and to alter the time for taking entries, declaration of handicaps or acceptances, and also the right to reject, at any time, any entry submitted to or for them. All races programmed will be run according to the Tasmanian Rules of Racing and under the Australian Handicapping Rules and the Handicapping Policies adopted by the Office of Racing Integrity unless specified in the conditions of the race.

Manual Field Selection

Races advertised as "Manual Field Selection" will be selected by the Handicapping Panel. Horses deemed by the Handicapping Panel to be the best credentialed based on criteria including form over the last 10 starts, beaten margins, mile rates, class of opposition, class of races, positions in running, barrier

draws and interference received will be declared as starters in the field.

Manual Field Selection applies to all races with prize money of \$15,000 or more and heats of races where the final is \$15,000 or more, unless otherwise specified in the race conditions. A horse that has not previously had a race start has no exposed form. Therefore, horses that have had a race start will be included first under the Manual Field Selection Policy. Trial form will not be considered. If balloting is required with multiple unraced horses a random ballot will be conducted to determine which of the unraced horses gain a start.

Approved & Adopted by Tasracing 16 January 2023, Effective 1 April 2023

NOTICE REGARDING THE DETECTION OF THE BRONCHODILATOR DRUG CLENBUTEROL

The International Screening Limit (ISL) for clenbuterol of 0.1ng/ml in urine has been adopted by Racing Australia and will be implemented by Australian racing laboratories with effect from 1 April 2023.

This will have important implications for the detection of clenbuterol following its administration to racehorses, and will lead to a **prolongation of detection times** for this substance.

The European Horserace Scientific Liaison Committee (EHSCL) has published detection time information for clenbuterol following both oral and nebulised administration. The published detection times of **13 days (oral)** and **6 days (nebulised)**, for the stated dosage regimen and pharmaceutical preparations, are valid for the new ISL to be applied by Australian racing laboratories.

The EHSCL detection time document can be found here; [www.ehslc.com/images/uploads/documents/EHSLC_DETECTION_TIMES_\(updated_1_February_2021\).pdf](http://www.ehslc.com/images/uploads/documents/EHSLC_DETECTION_TIMES_(updated_1_February_2021).pdf)

It should be noted that the revised detection times for clenbuterol are longer than the 3 - 4 days (oral) and 2 days (nebulised) previously reported, using the analytical methodology at that time, in the Australian Equine Veterinary Association (now Equine Veterinarians Australia - EVA) publication 'Detection of Therapeutic Substances in Racing Horses' ('The White Book').

Veterinarians are therefore advised that recommended withdrawal periods for treatment with clenbuterol (for example, in products including, but not limited

to, *Airway Gel, Claire Gel, Broncopulmin Powder, Ventipulmin Granules, Ventipulmin Injection* and products in combination with trimethoprim and sulfadiazine) must be based on the published EHSCL detection times and not on the previous advice provided in the 'The White Book', and that trainers are warned accordingly.

The EHSCL detection times appear, alongside those previously published in 'The White Book', in the current Equine Veterinarians Australia (EVA) publication 'Equine Medication Detection and Withdrawal Times: A Survey of Veterinarians in Australia'.

It is important to note that a withdrawal (or withholding) period is not the same as a detection period. Any withdrawal period should be calculated based on the published detection time, with the addition of a suitable safety margin based on the circumstances of the administration, including dose, route of administration and preparation administered.

It should also be noted that none of the veterinary preparations containing clenbuterol registered for use in Australia are registered for administration by nebulisation. Such administration therefore represents off-label use of these products.

The screening limit of 0.1ng/mL in urine for clenbuterol will come into effect on **1 April, 2023**.
