Spreyton Horse Access Surface Remediation

Work will begin on remediating the ground surface for horse access between the day stalls and trackwork chute this week on Wednesday, 23 August 23 and Thursday 24 August 23 as per the attached drawing.

This work will be completed next week on Wednesday, 30 August 23 by sealing the prepared surface with asphalt.

Works will commence each day at 0930hrs. This is to allow each participant to be clear of the day stalls after the completion of track work at 0900hrs each day. Once works commence there will be no access to or from the day stalls via this point from 0930hrs to 1700hrs each day. Access will be available each day for trackwork.

Thank you for your cooperation.
